EDUCATION

Dr. Vishwanath Karad MIT World Peace University

Aug. 2021 – May 2025

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.94

EXPERIENCE

Software Development Engineer — *React, Next.js, TailwindCSS, TypeScript*

December 2025 – Present

Borderline Genius (Tech Division of Portway Solutions)

Pune, India

- Developing and maintaining a SaaS platform using Next.js, React, and Tailwind CSS, delivering scalable and high-performance web applications.
- Architected and implemented SEO-optimized company website following modern web standards, improving search engine visibility and organic traffic.
- Analyzed business logic and backend workflows to seamlessly integrate RESTful APIs with frontend components, ensuring efficient data flow and system reliability.
- Collaborated with backend engineers to understand system architecture, contributing to API design discussions and integration strategies.
- Worked in an Agile/Scrum environment using Jira for sprint planning and GitHub for version control and code reviews.

Software Development Engineer — *Next.js, TailwindCSS, React*

January 2025 – December 2025

Portway Solutions India Pvt Ltd.

Pune, India

- Developed a modern and visually appealing company website using Next.js, React, and Tailwind CSS, ensuring a seamless user experience.
- Implemented responsive design and performance optimizations, improving website load times and accessibility.
- Collaborated in an Agile/Scrum environment, utilizing Jira for task tracking and Confluence for documentation.
- Managed version control and code reviews using GitHub, ensuring clean and maintainable code.
- Worked closely with UI/UX designers to translate wireframes into interactive and responsive web components.

Analytics & Data Science Intern — *Python - Selenium, Pandas*

September 2024 – December 2024

Go Digit Infoworks Services Pvt Ltd.

Pune, India

- Developed a Python and Selenium web scraper to extract data from websites, creating a dataset of 2,000+ new and used cars in Pune.
- Optimized a Python program using FFmpeg to compress video files, reducing compression time by 94%.
- Analyzed a dataset of 1M+ records to derive insights and create data visualizations.
- Consolidated multiple Python automation scripts into a single script, following SOLID principles and optimizing shared code.

Cyber Developer Intern — *React, TailwindCSS, TypeScript, Python*

June 2024 – December 2024

DeepCytes Cyber Labs (UK)

Pune, India

- Utilized Next.js and Node.js to develop robust back-end functionalities for a confidential project
- Analyzed and translated existing Python code into Node.js, ensuring seamless integration and performance.

Full-Stack Developer Intern — *React, TailwindCSS, TypeScript, Python*

June 2024 – August 2024

Tata Technologies Ltd.

Pune, India

- Cleaned a master address dataset with over 760,000 rows, improving 20,000 affected rows.
- Conducted sentiment analysis on news articles and social media posts related to Tata Technologies using Python and APIs.
- Developed a dynamic and responsive website and displayed sentiment analysis findings.

PROJECTS

EDITools - Online SaaS Platform | *Next.js, React, Tailwind CSS, Prisma*

GitHub: github.com/AarulKoul/EDITools

- * Developed the EDITools web application using Next.js, React, Tailwind CSS, and Prisma.
- * Enabled PDF vectorization and storage in a database for seamless information retrieval.
- * Implemented a chat interface for users to ask questions about PDF content.
- * Designed and executed a subscription system with free and premium plans.

Kamao | *Next.js, React, Tailwind CSS, PostgreSQL*

GitHub: github.com/AarulKoul/Kamao

- * Developed a platform where small businesses can connect with possible investors to invest in their ventures.
- * Added feature for businesses to showcase their business in graphical format with charts.
- * Added feature for businesses to pitch their business using videos.

PolyTalks - Social Language Learning Platform | *Next.js, React, TypeScript, Tailwind CSS, Firebase*

GitHub: github.com/AarulKoul/PolyTalks

- * Built a social language learning platform connecting users through languages they are learning, promoting authentic conversation over traditional lessons.
- * Implemented real-time chat functionality and user matching algorithms using Firebase Firestore and Authentication.
- * Designed an intuitive UI with Tailwind CSS enabling users to create profiles, list languages, and find conversation partners.
- * Developed features for language proficiency assessment and personalized partner recommendations.

Movie Recommender System | *Python, Pandas, Scikit-learn, Flask*

GitHub: github.com/AarulKoul/movie-recommender

- * Built a content-based movie recommendation engine using cosine similarity on movie metadata.
- * Processed and cleaned a dataset of 5,000+ movies using Pandas for feature engineering.
- * Developed a Flask web application to serve recommendations with an intuitive user interface.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript/TypeScript, HTML/CSS, Dart

Frameworks: React, Angular, Next.js, Node.js, Spring, Flutter, TailwindCSS

Tools: Git, Docker, Google Cloud Platform, Postman, Firebase

Databases: MySQL, MongoDB, PostgreSQL, Firebase

ACHIEVEMENTS AND CERTIFICATIONS

- * Reply Code Challenges 2024 - Placed in top 3.5% of teams out of 1800+ teams.
- * National Academic Immersion Program - Certificate of completion of course in Patent Drafting and Review Writing.
